

UNITED STATES PATENT AND TRADEMARK OFFICE
CERTIFICATE OF CORRECTION

PATENT NO. : 7,798,147 B2
APPLICATION NO. : 10/627941
DATED : September 21, 2010
INVENTOR(S) : Hendricksen et al.

Page 1 of 1

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Title Page, Item (75) Inventors should read as follows:

Michael Hendricksen, Redwood City, CA (US); **Peter Wilson**, Killingworth, CT (US); **Ronald Hundertmark**, San Diego, CA (US); **Antony J. Fields**, San Francisco, CA (US).

Claim 50 should read as follows:

50. A flow control device for a bronchial passageway, comprising:
a valve member that regulates fluid flow through the flow control device, the valve having a default shape;
a frame coupled to the valve member, the frame including:
a valve protector region that at least partially surrounds the valve member to maintain the default shape;
a first retainer region connected to the valve protector region; and
a second retainer region connected to the valve protector region,
the first retainer region being formed of a plurality of interconnected struts configured to engage an interior wall of the bronchial passageway to retain the flow control device in a fixed location therein, the first retainer region being movable from a contracted state suitable for introduction into the bronchial passageway to an expanded state suitable for engaging the interior wall of the bronchial passageway; and
a membrane covering at least a portion of the first retainer region, wherein at least a portion of the flow control device forms a seal with the interior wall of the bronchial passageway when the flow control device is implanted in the bronchial passageway, and wherein the membrane provides a fluid pathway from the seal to the valve member to direct fluid flowing through the bronchial passageway into the valve member.

Signed and Sealed this

Thirtieth Day of November, 2010
